

UPS offers packaging advice to help to prevent damages

Europe Region Packaging Consulting Test Lab

The UPS Packaging Test Lab offers the following services:

□ **Consultation by phone & e-mail**

We will gladly answer your packaging questions quickly on the phone or in detail by e-mail.

□ **Quick packaging evaluation based on photos and descriptions**

Please send us photographs of your packaging and the product being shipped together with information regarding weight, dimensions and fragility. We will help you to find possible weak spots in your packaging and identify alternatives.

□ **Packaging certification based on a standardized drop test procedure**

After UPS approves your packaging, it is possible have it certified according to the DIN EN norm in our test lab. All details are issued in our test report. Charges apply for this service.

□ **Support regarding packaging development**

Of course we can also support your development of new packaging and will offer advice to you and your packaging company.

□ **Provide contacts to professionals from the packaging industry**

Our strong involvement with the packaging industry provides us with many contacts. We can help you to find the right partner for your projects.

Please contact your local Sales Representative for more details or contact us directly:
